Philadelphia.

[Correspondence of the Herald.] PHILADELPHIA, Nov. 22, 1842. The weather continues cold and clear, with but little animation along our wharves, or in our business thoroughfares. As for news, the Colt excitement absorbs every thing else, and occupies the pub lie mind with vague conjectures and idle reports.

In our Courts, but little is going on. A case of riot was before the Sessions to-day, arising from a conflict between some members of our fire department.

The trial of young Alexander, which I referred to yesterday, will be an interesting one, from the fact of its attracting so much attention from the ladies, a large number of whom have already applied for seats upon the occasion. Wonderful curiosity!

The elections of bank directors took place, as previously advertised, at the several banking houses in the county of Philadelphia, but contrary to expectation, very little, if any, change occurred. This is much to be regretted for various reasons, all of which the public at large are most sadly aware of. The following are the names of those who head the list of each board, from which the community can form a correct estimate of the future management of the institutions over which they preside.—Commercial Bank, James Dundiss: Farmers' and Mechanics', Jos. Tagert; Philadelphia, Samuel F. Smith; Bank of Northern Liberties, Robt L. Pitfield; Kensington Bank, Jonathan Wainwright; Mechanics' Jos. B. Mitchell; Western, Jos. Patterson; Moyamensing, (swindling affair,) Jos Solms, of notorious bad memory; Bank of Penn Township, (broke,) Elijah Dallett; Schuykill, (of Levis notoriety.) John Price Wetherill. It is needless to add one word of comment upon the above.

Mrs. Eliza Shaw, a poor woman, residing in Marriott's Lane, Southwark, accidentally iell into the fire yesterday morning, in a fit, and was burned to death.

Several more cloth cases, of considerable importance to the pockets of Uncle Sam were determined vesterday, in the United States District Court, in favor of the General Government.

The sale of State stocks, which will take place to-morrow, seems to attract but very little attention Gov. Porter, and the Secretary of the Commonwealth, Judge Parsons, (that is to be) are now beth in the city. What the object of the fermer's visit can be, no one doubts, as having some interest in connection with the above sale. The latter is here to inspect the public schools—and I suppose to take a peep at his new seat upon the bench! They are the only "lions" at present sojourning among us, if we except those exhibiting at the corner of 13th and Spruce streets, and Welch's buffaloes!

The jury in the case of Brown, Brothers & Co., and Fletcher, Alexander & Co., against the funds found in the possession of Co! Monroe Edwards, and now deposited in the Norin America Bank, have assessed the formers' damages at \$27,962, and the latters' at \$27,690. The amount taken from Edwards was \$43,000. Action has been instituted against Recorder Vaux for the recovery of the same.

The Olympic Circus, last night, was one of the most crowded houses I ever witnessed. The evenior's entertainneants were for the henefit of Mr. ning's entertainments were for the benefit of Mr Rufus Welch, the generous and gentlemanly pro rietor.
The Walnut Street Theatre was but slimly attend

ed, owing, in all probability, to the great attraction at the "Olympic."

Miss Ayres' benefit at the Chesnut, was not so well attended as the meritorious recipient deserved. To morrow evening Mr. Wood takes a benefit.

The following sales occurred at the Stock Board to-day. They evince a larger amount than has taken place for several days: -\$2000 City Loan, 5's, 1864, 92; \$100 City Gas, 6's, 1861, 104; 2000 State 5's, 1870, 44; 1300 do do 6's, 1863, 104; 2000 State 5's, 1870, 44; 1300 do do, 1865, 44; 11 shares Mechanics' Bank, 12j; 16 do do 12j; 23 do Schuy kill Navigation, 25; 10 do Philad & Trenton R Road, 50.

ties. Hence coldness of the hasts and leet, accompanies with headaches, giddiness, and many other unpleasant complaints.

Wright's Indian Vegetable Fills are one of the best preventives in the world against cold feet, because they not only cleanse the blood from those impurit es which are the cause, but they impart an e ergy to the circulation which carries it with vigor to every part of the system; consequently the extremities being properly supplied with the vital fluid, receive their due proportion of animal heat; and coldness of the feet, headache, giddiness, palpitation of the heart, and every other symptom of a disordered circulation will be rapidly criven from the body.

BEWARR OF COUVEREFIETS.—The public are respectfully informed that medicine purporting to be Indian Fills, sold by Mr. Richard D. nnis former clerk in the office, are not the genuine Wright's Vegetable Fills. Stainburn Vegetable Extract Pills—Fever and Ague Cured.

"For the benefit of the afflicted, I am induced to acknowledge the benefit I have experienced from the use of six doses of the Stainburn Extract Pills. My case was that of the first stage of Fever and Ague, and which came on every 24 hours. I tried almost everything that was recommended to break the chill, but none proved effectual except the Stainburn Pills, which I took about a half hour before the usual time for the chill to come on, and I can confidently say that they broke it entirely. It is now three days since I took the last dose, and I have not had the slightest symptoms of the chills returning. I have recommended the Pills to several of my friends, who were afflicted similarly to myself, and their testimonials in favor of the Pills are such as to induce me to send their cases accompanying this.

607 NEW TEMPERANCE NOVEL.—To-morrow morning will be issued in an Extra New World, an original and beautifully written Novel, by a popular American author, entitled "Franklin Evans, or the laebriate, a Tale of the Times," delicated to the friends of Temperance in this city and throughout the Union. It was written with a view to aid the great work of reform, and rescue young men from the Demon of Intemperance. The incidents of the plot are wrought out with great effect, and the excellence of the moral, and the beneficial influence it will have, should interest the triends of the Temperance Reformotion in giving this tale the widest possible circulation.

The position of the trade between the United States and

he British colonies, has, of late, been a matter of much discussion, from its alleged disadvantages to the United States. Last winter, a large book was compiled under the direction of the Secretary of State, wherein it is alleged that the United States have greatly suffered by reason of the proclamation of the President of the United States, of Oct. 5th, 1830, opening the ports of the United States to colonial vessels, and that the British government has evaded the conditions on which that proclamation was has evaded the conditions on which that proclamation was issued, by opening only certain inconvenient ports to American vessels, by which they are unable to compete fairly with those of the colonies. The only instance mentioned to show the truth of this allegation, is, that mentioned to show the truth of this allegation, is, that gyrsum, or plaster of Paris, is brought almost entirely from the Bay of Fundy in British vessels, which are allowed to go directly to the quarries, while American vesseß are denied that privilege. Several memorials from Boston and Maine, all tending to the same object, give this gypsum trade as a reason for disturbing the existing state of things. A report of the Hon. Caleb Cushing, making a volume of 217 pages, is full of declamation on the ruln attending American commerce, the whole being based on this strocious gypsum. A recent conventien at Boston, headed by the Hon. Abbott Lawrence, alleges this wonderful gypsum to be the cause of the destruction of American commerce. The prohibitive tariff is by them considered a measure of saving grace; but to import gypsum in foreign vessels, what nation can stand import gypsum in foreign vessels, what nation can stand it? All these memorials, reports, chairmen and secreta-ries, hold up gypsum as the great staple of trade between he two countries. Let us turn to the public documents

The proclamation opening the ports was made October 5, 1830. What a deal of mischief that measure has wrought to the farmers, by increasing the sale of the leading articles of their produce 600 to 1,000 per cent! and tour-fifths of it carried in American vessels! We may now look at the general state of trade at differ

19,559,741 This table clearly presents the fact that open orts of the United Sta'es to colonial vessels in 1830, has acreased the sales of the produce of the Western States, up to 1840, \$5,000,000, during which time the exports o hose articles to the British colonies have increased \$6, 100,000; of which increase \$4,000,000 was in American ottoms. Let us now recur to the import tables, in order

to see what was got in exchange :-IMPORTS FROM THE BRITISH COLONIES INTO THE UNITED STATES. 1831. 177,834 63,291 1,084,050 104,295 5,070 54,236 153,896 117,657 29,601 116,403 82,553 22,553 700,794 16,363 1,538 28,325 2,100 99,824 23,896 15,313 203,776 817,768 750 691 67,072 3,085,932 2,135,816 919,116 2,7.2,242 2,012,181

So it appears that nearly one half of the pecie, and that the sales of produce to the colonies exceeded the purchases from them in 1840, \$5,775,346. This amount was paid, \$1,327,728 in specie, and the balange in bills on England. This vast and profitable trade to the United States, has all grown up since the proclamation of October, 1830. During all this improvement of the colonial market for the sale of western produce, being in breadstuffsalone a rise from \$848,128, in 1829, to \$4,616,611 in 1840, the colonial sales of this identical gypsum have not increased at all! clearly showing that the restrictions imposed by Great Britain on the means of obtaining that commodity, have injured none but her own subjects. the owners of the quarries. An imitation of that absurd conduct on the part of the United States, would injure none but the western farmers, who would lose the most valuable market for their produce which they now com-mand. At the same time it would greatly benefit the Canadian farmers, who would thereby be relieved from a serious competition. This is so clear to any one who inspects the state of the trade, that an attempt to restrict the com-merce between the United States and the British colonies,

has the appearance of a direct and wanton attack upon the farmers' pockets.
It is not a little astonishing that Caleb Cushing, Esq. Abbott Lawrence, Esq and other influential men, should attempt so far to practice upon the credulity of the people as to complain of the import of \$129,000 worth of gyp sum in British American vessels in 1840, when in the sam year American vessels carried to those identical colonies \$4,124,157 of United States produce. The only object

seems to be to destroy the foreign market for western pro-duce altogether, because the effect of the late tariff, if continued, will be to cause a large import of foreign manufactures in return through the British provinces, in evasion of the duties. By restricting the intercourse these people seem to expect to hem in the farmers, and compel them to buy all their goods in Lowell, at prices dictated by the manufacturers, and to leave their produce to rot in their barns, rather than to sell it abroad. There is no trade in which the United States are engaged which is of greater importance to the farmers than this with the British colonies; and as it is now regulated, the United

States have nearly all its advantages.
